HOUSE OF TEST

COURSE · WORKSHOP

Requirement Engineering

Requirement management equips professionals with the skills to effectively gather, analyze, and document project requirements.

1 day | In-person, on-site workshop | English, French | 3-16 participants | CHF 6'000 per team

You will learn

- How to gather requirements
- Identify the various kinds of requirements
- Practice writing and refining requirements
- Review the lifecycle for requirements
- Why "As a user, I want to log in using an identifier and a password" is not a correct requirement
- Various techniques for requirement verification and validation

Course content

Requirement management equips professionals with the skills to effectively gather, analyze, and document project requirements. This ensures that all stakeholders have a clear understanding of project goals and deliverables, leading to improved communication and collaboration. By mastering requirement management, participants can reduce project risks, avoid scope creep, and enhance the overall quality of the final product. Additionally, this course helps in aligning project outcomes with business objectives, ultimately contributing to the success and profitability of the organization.

WHO IT'S FOR

Project Managers, Business Analysts, Product Managers, Developers & Engineers, Quality Assurance Professionals, Stakeholders & Clients

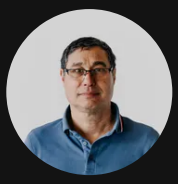

PARTICIPANTS BRING

Laptop with Excel or equivalent

ROOM REQUIREMENTS

Projector, whiteboard, some paper sheets and pens, WiFi

YOUR INSTRUCTOR

Alexandre Bauduin

Quality Expert

Alexandre Bauduin is a seasoned professional with over 25 years of experience in the information technology and services industry. He holds a Master's degree in Electronics, Robotics and Software engineering from INPG/ESISAR (Institut National Polytechnique de Grenoble) and has a strong background in software development, system architecture, and project management. Throughout his career, Alexandre has demonstrated a commitment to innovation and excellence, making him a valuable asset to any educational program. His extensive experience and passion for technology equip him to provide students with practical insights and a deep understanding of the subject matter.
